Subject: RE: Haul Roads Information (UNCLASSIFIED)

This is my focus as well. The 2005 ROD expressly addresses, as the SLAPS VPs (2.1.2.2), the haul routes - Eva Avenue, Frost Avenue, Hazelwood Avenue, McDonnell Avenue, and Pershall Road. These are the routes between SLAPS and HISS. Those route have been sampled. It is not clear to me what the haul routes were from Latty Avenue to West Lake and whether those routes were ever considered. I believe that our analysis needs to focus on those routes.

As to the BMAC, it appears that that area is well to the west of the SLAPs, SLDS, WL areas and their haul routes. I don't understand why there would be any reasonable basis to support that there may be rad contamination there.

Dear Cecilia:

I'm going to assume that you are looking for information regarding USACE sampling of haul roads between Latty & Westlake (since that seems to be the topic of the day.)

USACE has sampled and remediated haul roads between SLAPS and HISS since the completion of the 2005 ROD. These roads are Pershall Road, Latty Ave, Hazelwood Ave, a small stretch of Lindbergh, Frost, Banshee and McDonnell Blvd.

USACE never sampled the roads from Latty to Westlake Landfill.

The sampling mentioned in the 2005 was completed by DOE prior to USACE assignment to FUSRAP in 1997. It was only mentioned in the ROD in order to give a full picture of the sampling completed to date in the area. (In hindsight perhaps it should not have been mentioned.)

The sampling completed by DOE was briefly mentioned in a report completed by DOE. We are trying to find some sort of document with the actual sample results but are having no success. (At this point I am not sure we even have the data since the area would be outside the scope of FUSRAP as Westlake was not a FUSRAP project at the time of the transfer of the program from DOE.)

If we find anything more, we will let you and the State know.

(Also - as a side thought, someone here recalls MDNR sampling these roads in the 2003-2004 timeframe. You may wish to touch base with them.)

I hope this helps.

Sincerely,
Sharon Cotner

Subject: [EXTERNAL] Haul Roads Information

Is there any other haul road information other than the work USACE completed that resulted in the 2005 ROD ?

Thanks
